

REXEL BINDING MACHINES

Rexel Business Machines

*Your No. 1 partner
for document presentation,
protection and security*

ACCO, the world-leading office products company,
has the most powerful brand portfolio in the business –
including Rexel Business Machines.

All around the world, Rexel, Nobo, Kensington,
Twinlock, Swingline and Wilson Jones help to put people
in control of their workspace.

No.1 for Experience and New Ideas

For more than 50 years Rexel have been creating and building products wholly responsive to their users' needs. An unusual blend of engineering skills, innovation and classically simple design has produced many firsts in binding, laminating and shredding. Today, it produces products that take both form and function to new heights.

No1 for Style and Innovation

For many people, Rexel products mean style and innovation. As brand leaders they dominate a crowded market through the quality of their design and the unique features they offer to the user.

We are always looking for new ways of thinking, always moving away from the commonplace in search of new ideas.

The new Rexel binder range brings together a host of new ideas and features: all are about improved performance, about working more simply, about making life easier for the user.

No1 for Reliability

As we see it, to be the best we must also be the most reliable. Skilled engineering, new ideas and superb design all combine with one purpose – to do the job better. And to be there when needed. That's reliability. That's what you get from products that perform.

COMB BINDING

Of the many binding systems available, comb binding is by far the most popular. Quick and simple, comb binding suits a wide variety of user needs. It also offers total flexibility, and you can bind the smallest document or a 450 page report with ease.

Comb binding is also a very practical binding method. Comb bound documents open out completely flat so they are ideal for presentations and easy to photocopy. The pages are completely secure yet easy to update, as sheets can be added or deleted when required.

Rexel comb binders make life even easier for you. They punch many more pages than other systems, yet require less effort. Documents can be bound much more quickly too, because of the unique, separate comb opening mechanism. The robust, all metal chassis and mechanism means you can use a Rexel comb binder day after day with superb results every time.

Rexel offers a comb binding system to meet every binding requirement, from a compact budget machine to the convenience of electric punch models. All will create professional documents in a matter of minutes.

Comb & Wire Binding

CB405

Fully featured office model, providing both regular plastic comb binding and also wire binding for fast A4 binding in the general office.

- Features the 'Flowline' concept for faster operation
- Reselectable punches handle all documents up to A4 size
- Translucent cover keeps work area clean when not in use, and provides support for pages being punched
- Punches up to 30 sheets each time
- **TIP SYSTEM** punch system provides better quality paper punching with less effort
- Binds A4 documents up to 450 pages
- Uses all sizes of plastic combs from 4.5mm to 50mm
- Binds A4 documents up to 120 pages using 20 loop wire elements
- Uses all 20 loop wire elements from 6mm up to 12.5mm
- Precision edge guide adjusts to ensure accurate alignment
- Document measure to determine which comb size to use
- Margin is adjustable to suit the size of comb being used
- Wire clamp is protected for safer operation
- Patented 'Lowline' comb grip system for greater safety
- Plastic combs are opened with the new 'simply click' system. Two knobs are fitted to suit LH or RH use

CB405

- High capacity waste container requires emptying less frequently
- Full width punch handle doubles as a carry handle when locked
- May be stored vertically to save space
- Includes starter kit

Code: 2100568

CB405E

All the performance and features of the CB405 with Electric Punching

Code: 2100569

CB405E

Binds with Plastic AND Wire

Select punches for paper sizes

Adjust margin to match comb size

Convenient storage

Easy action comb opening

Comb Binding

CB355

High performance office model, featuring the 'Flowline' concept for faster A4 binding in the general office.

- Translucent cover keeps work area clean when not in use, and provides paper support during the punching process
- Punches up to 25 sheets each time
-  punch system provides better quality paper punching with less effort
- Binds A4 documents up to 450 pages
- Uses all sizes of plastic combs from 4,5mm to 50mm
- Precision edge guide adjusts to ensure accurate alignment
- Document measure to determine which comb size to use
- Covered storage tray keeps plastic binding combs ready for use
- Patented 'Lowline' comb grip system for greater safety
- Plastic combs are opened with the new 'simplyclick' system
- High capacity waste container requires emptying less frequently
- May be stored vertically to save space
- Includes starter kit

Code: 2100566

CB355E

All the performance and features of the CB355 with Electric Punching, featuring the "Flowline" concept for fast binding in the general office.

Code: 2100567

Flowline concept for easier and faster binding

CB305

Full sized office model, featuring the 'Flowline' concept at a practical price for the home and small office.

- Punches up to 15 sheets each time
- Binds A4 documents up to 175 pages
- Uses all sizes of plastic combs from 4,5mm to 20mm
- Precision edge guide adjusts to ensure accurate alignment
- Document measure to determine which comb size to use
- Storage tray keeps plastic binding combs ready for use
- Patented 'Lowline' comb grip system for greater safety
- Plastic combs are opened with the new 'simplyclick' system
- High capacity waste container requires emptying less frequently
- May be stored vertically to save space
- Includes starter kit

WIRE BINDING

Wire binding produces professional documents that not only look good but are also very easy to use. Wire bound documents are completely secure yet the pages open easily, can be laid flat or even turned through 360° for easy reference and photocopying. Wire bound documents are smart yet business-like, just the right image for any organisation.

The Rexel range of wire binding systems is highly innovative, combining stylish good looks with exceptional performance. Incorporating the latest wire binding technology, these superb machines are the result of an extensive programme of market research, design and development.

Rexel is the leading brand for advanced binding systems and the wire binding range reflects Rexel's renowned expertise. All Rexel wire binding machines use the international standard 3:1" 34 holes punch pattern so that whatever the binding requirement, Rexel can offer a wire binder to suit. There's also a wide range of complementary binding mechanisms and covers to create individual, easy to use documents.

THERMAL BINDING

Thermal binding is ideal for all kinds of documents, from staff directories to instruction manuals. It provides permanent protection for all your important reference material and the finished result is extremely smart. Thermal bound documents are neat and flat, making them easy to store or carry around. By choosing covers in

different colours and finishes, you can also create a colour coded library of all your important documentation.

Thermal binding is the ideal binding method when time is limited as it requires no initial preparation. Simply place the loose pages of your document into a thermal cover, wait a few seconds for the binding machine to reach temperature, then place your document inside.

Within seconds you'll have a smart, permanently bound document.

A Rexel thermal binder produces highly professional results with a minimum of effort. It sits neatly on a desktop, ready for use at any time. Using a Rexel thermal binder, you can also bind several documents at the same time, which makes the process even faster and more economical.

Thermal binder overview

Model	Code Binding	Max Binding Capacity (mm)	Max Binding Capacity (sheets)	Format Cycle	Binding Cycle	Binding Size Periods	Cover Size Guide	'Cycle Complete' Signal	Cooling Support	Document
